

PRESTOZ

Audience Engagement Toolkit
Transform passive audiences into active participants

The Training Industry's Challenge

Facilitators deliver content. Participants sit attentively — or appear to. Feedback forms are collected. Everyone moves on. But beneath this lies challenges: silence after questions, uncertainty if content landed, feedback arriving too late, participants hesitant to speak up.

Facilitators	Organizers	Participants
<ul style="list-style-type: none">• Silence after questions• No mid-session pivot• Late feedback	<ul style="list-style-type: none">• No real-time metrics• Hard to prove ROI• Paper delays	<ul style="list-style-type: none">• Hesitant to speak• Questions held back• Feeling unheard

The gap is in the tools. Prestoz fills that gap.

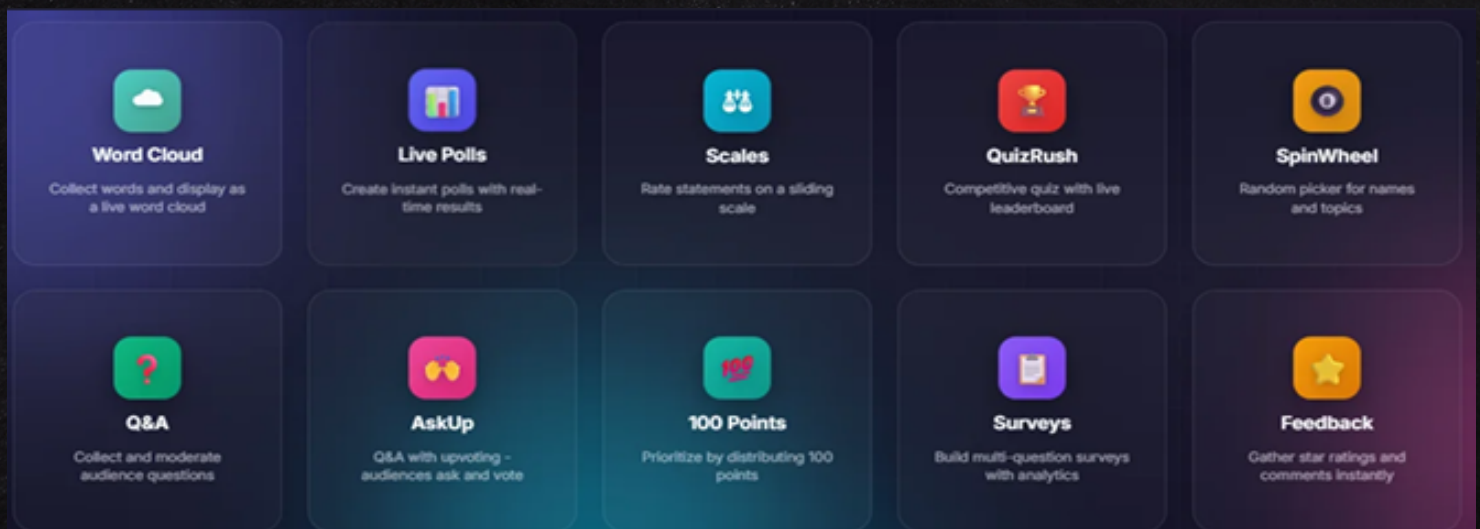

Introducing Prestoz

Web-based toolkit with 10 purpose-built tools for trainers, speakers, and facilitators. No app downloads. No complex setup. Real-time results. Participants scan QR code and engage instantly.

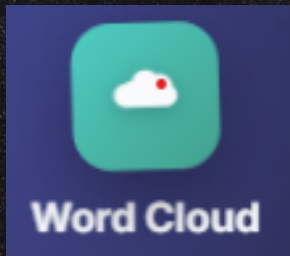

Any Device • Anonymous/Identified • Export Analytics • Configure in Minutes

Anonymous or Identified — You Decide

Anonymous: Honest participation, ideal for sensitive feedback. Identified: Track contributions for assessments. Single toggle switches modes.

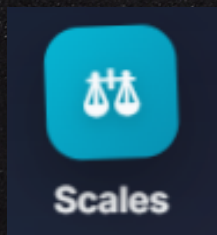

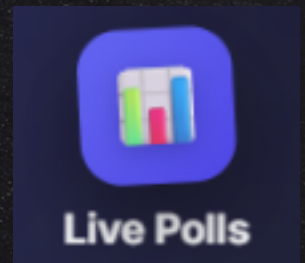

Detailed Tool Descriptions

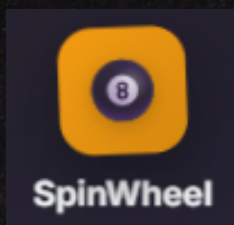

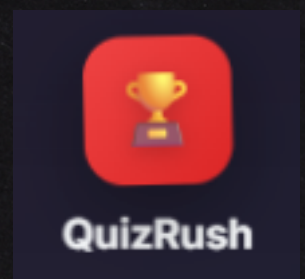

Everyone scans and types ONE word. Within 30 seconds, responses pour in anonymously. Visual cloud forms – "Vision" appears large, "Integrity" grows. Works for any topic: soft skills, technical concepts, strategy. The conversation starter comes FROM the audience

Launch quick poll after explaining concept. Results appear instantly. If 40% chose wrong answer, you know exactly what needs clarification – while there's still time. Anonymous responses mean no embarrassment. Learning gaps visible before they become problems.

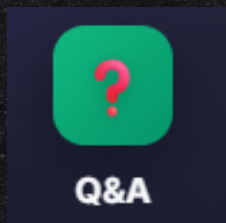

Create rating statements with sliding scales (1-10). Results display averages WITH distribution curves. See a cluster at 3 and another at 8? You have two distinct groups needing different approaches. Perfect for mood checks, confidence ratings, agreement levels.

Post-lunch energy dip? Launch QuizRush. Leaderboard on screen. Faster correct answers = more points. Suddenly there's laughter, competition, energy. Winner gets bragging rights. Everyone gets learning reinforcement – disguised as a game.

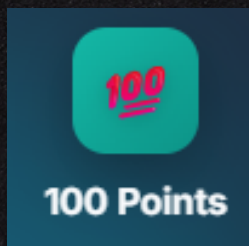

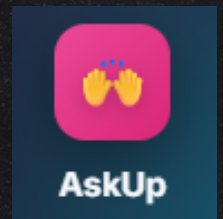

Need someone for role-play? Load names into SpinWheel. Spin it on screen. Wheel animates beautifully, slows dramatically, lands on a name. Fair. Fun. Transparent. Works for Table Topics, prize draws, any random selection

Detailed Tool Descriptions

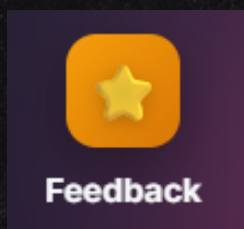

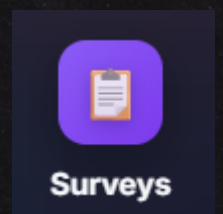

Participants type questions anytime — no interrupting. All captured in writing on your dashboard. Address during Q&A time or weave into content. Mark as answered/pending. Create follow-up documents. Nothing forgotten.

Everyone sees submitted questions and can UPVOTE favorites. Popular questions rise automatically. Address what majority cares about, not just loudest voice. Quieter participants get equal influence. Democratic Q&A.

Rate 5 skills? Everyone says "Very Important." Give them 100 points to distribute — constraint forces genuine prioritization. Results show collective priorities and trade-offs. Perfect for needs assessment, decision-making

Multi-question surveys with various types — multiple choice, ratings, open text. Responses flow to analytics dashboard. Patterns visible instantly. Export to Excel. Perfect for pre-training assessment, detailed evaluation.

Collect after EACH module. Star rating + comment. 2 minutes. By lunch, you know Module 2 didn't land well. Adjust Module 4 accordingly. Facilitator owns feedback in real-time. Continuous calibration.

The Story Behind Prestoz

Dr. Sundararaman Chintamani — Reinvention Catalyst for the AI Era

40+ years across eight career reinventions — petroleum refining at CPCL, IT consulting at Tech Mahindra & HCL, now corporate trainer and keynote speaker. Distinguished Toastmaster (twice). Author of "Business Storytelling for Leaders" and "Impromptu Speaking" As a Design Thinking evangelist, Prestoz was built by empathizing with three stakeholders: the Audience (want to engage safely), the Facilitator (needs real-time feedback), and the Event Organizer (needs measurable outcomes).

The Reinventor's Approach

At 63, leveraged AI to build what would require a dev team and months. Prestoz deployed in days — proof that domain experts can build solutions without becoming technologists.

Credentials

- 40+ years: Petroleum refining, IT consulting, corporate training
- Distinguished Toastmaster (DTM) — awarded twice
- Regular faculty: Indian Bank IMAGE, SBI, Equitas Bank
- Design Thinking practitioner, Industry 4.0 assessor
- Keynote: Reinvention, AI adoption, Cybersecurity, Personal Branding
